REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art fails to teach a stop piece comprising a first end having a first angled cut at an obtuse angle and a second end having a second angle cut at an acute angle for an accurate angle cutting of lumber as set forth in claim 1.

Baker teaches a stop piece 18, a cutting guide 11 having an inverted L-shaped configuration, an elongated horizontal component 11b, a vertical component (see Fig. 3), a slot 11a, a plurality of apertures with a plurality of screws 16, but doesn't show a first end having a first angled cut at an obtuse angle and a second end having a second angle cut at an acute angle. Also, Castleton teaches a first end having a first angled cut at an obtuse angle **B** and a second end having a second angled cut at an acute angle **A** for the purpose of guiding the saw for cutting the workpiece at the exact angles without adjusting the stop piece or guide. However, there is no motivation to combine Castleton with Baker, because Baker provides a guide bar 52 located on top of the cutting guide 11 for making angle cuts in the lumber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
